Region 1 Hosts Staffers from the New England Congressional Delegation

On May 16th EPA Region 1 hosted our 6th annual Congressional staff briefing. Staff from 25 offices in the six states attended the briefing either in person or on the phone. The annual briefing is an opportunity for staff to gather in Boston and hear from the Regional Administrator and Office Directors on national and regional issues and initiatives. The day consisted of a morning plenary session and afternoon, state-specific, break-out sessions. The event provided the opportunity for participants to hear EPA updates and discuss topics including PFAS/PFOA, lead in drinking water, permitting, nutrients, and LEAN. The afternoon sessions allowed time for state specific discussion on topics including Brownfields, Superfund, PFAS, and NPDES permitting.
